Maintenance + Care

Turbo broom USP 10

The USP 10 turbo broom makes it easier for you to remove old brick dust in spring. Thanks to its low weight, the broom is easy to move. The V-belt drive enables left/right movement, so even the corners of the tennis court can be removed cleanly. The USP 10 turbo broom is very versatile. For example, it can also be used for clearing leaves and snow from paths and car parks.

Controlling the direction of rotation

Height adjustment

Engine control unit

Technical data:

- Engine: Honda four-stroke engine approx. 5 hp. Normal petrol
- Drive unit: Manual drive
- Sweeping brush drive: V-belt drive left/right
- Working width: approx. 90 cm
- Tyres: Balloon tyres
- Weight: 83 kg
- Time required per court: approx. 40 min.

No. 40161

Accessories:

- No. 40165 Brush ring PVC double white
- No. 40164 Brush ring PVC/steel
- No. 40162 Swath former

Clay Box

A combination of fiberglass-reinforced plastic and resin make this clay box very stable. The material is UV and weather resistant. Metal parts are stainless steel. Every clay box has a hinged lid. Color: grey, orange.

No. 41290	700 kg	550 Ltr. 134 x 99 x 78 cm

Wheelbarrow Standard

Capacity: 85 l, 240 kg. Galvanized barrow with beaded rim, 1 pneumatic tire 400 x 100 mm with nylon sleeve bearing.

No. 40103

Wheelbarrow Universal 100 l

Capacity: 100 l. Seamless pressed, galvanized barrow with sturdy rounded rim, 2 pneumatic tires, load 300 kg.

No. 401021

Wheelbarrow Court Royal

This newly developed wheelbarrow for tennis sand should not be missed on any tennis court. Capacity 250 l, polyethylene synthetic bottom, 6 mm wall thickness, allround stable rim, break proof, high abrasion resistance and complete UV-stability, stable 1" tubular steel frame, phosphated and plastic-coated, reinforcing cross-bars for stable bottom, simple emptying via tube runners, ball bearings air tyres with pneumatic wheels, size 400 x 80 mm, load-carrying capacity 350 kg.

No. 401025

Aluminum Multi-Purpose Shovel

To spread clay or to remove old material and leaves, complete with handle.

No. 40101

Size: 380 x 380 mm

No. 40100

Size: 340 x 325 mm

Frankfurt Shovel 1]

Round shovel made of steel, painted red, oil-hardened with ashwood handle.

No. 40099

Holstein Shovel 2]

Square shovel made of steel, painted red, oil-hardened with ashwood handle.

No. 40098

**Drain Cleaner A**

To clean drain gutters. 5 cm wide, complete with wooden handle.
No. 40030

Gutter cleaner

Made of aluminum, collapsible, light construction, simple to handle. An essential tool for the groundkeeper for checking levels and finding hollows. Length 10 cm.
No. 40033

**Hand Leveler**

Made of aluminum, with rubber blade. To wash in the top covering and clear puddles, 190 cm wide.

No. 40020

Spare rubber blade for hand leveler

No. 40021

**Rubber Rakes**

For fast removal of leaves and rubbish, without handle.

No. 40090 50 cm wide

No. 40089 75 cm wide

Wooden Handle Ø 28 mm for Rubber Rakes.

No. 411133

Handle for ROYAL

Made of wood, Ø 23 mm, length 1,46 m [see page 14]*

No. 411132

Wooden handle 28 mm

28 mm Ø, slightly tapered, 1.5 m long. For aluminum scraper, wooden rakes, aluminum rakes, plows.

No. 40094

Wooden handle 24 mm

24 mm Ø, 1.5 m long. For rakes, rubber rakes, line sweepers, line guider, match liners, line brooms.

No. 40091

*) Dimensions not binding

**Rubber Squeegee**

Steel bar with rubber blade. Specially intended for stone removal. Light leveling of loose courts and water removal on hard surfaces, 100 cm wide, handle included.

No. 40022

**Aluminium Clay Spreader**

To fill in holes and level irregularities, 100 cm wide, without handle.

No. 40060

Wooden Handle Ø 28 mm

for Rubber Rakes.

No. 40094

**Wooden Rake**

Triangular beech wood, 70 cm wide with saw blade, without handle.

No. 40040

Wooden Rake as above, though without saw blade.

No. 40042

Saw Blade for wooden rake.

No. 40051

Wooden Handle Ø 28 mm

No. 40094

**Aluminum Plow**

One side with steel band saw blade, the other side with solid profile, 70 cm wide.

No. 40050

Saw Blade for plow

No. 40051

Wooden Handle Ø 28 mm

No. 40094

**Aluminum Surface Profile Blade**

To smooth out irregularities, without handle.

No. 40080 80 cm wide

No. 40081 150 cm wide

Wooden Handle Ø 28 mm

No. 40094

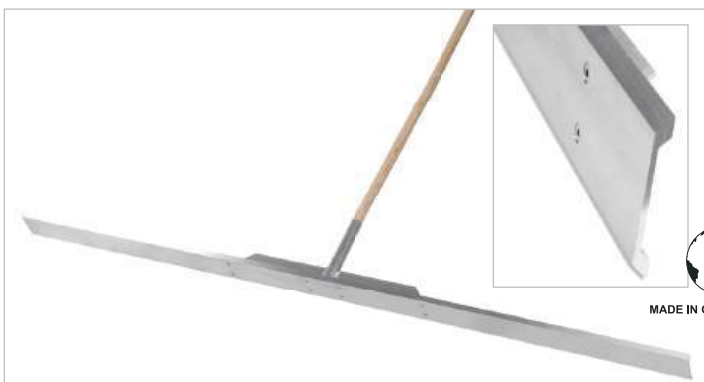

**Aluminum Scraper**

Double-sided tool, one side toothed to roughen surface, other side flat for spreading. 80 cm wide, without handle.

No. 40070

Wooden Handle Ø 28 mm

No. 40094

**Dressing Spreader**

Trapezoidal shaped aluminum section dressing spreader. Light and easy to handle yet robust for precise distribution of material over large areas, 190 cm wide, without handle.

No. 40084

Wooden Handle Ø 28 mm

No. 40094

**Special Rake**

Made of stainless steel, corrosion-resistant, for professional smoothing of clay courts, 66 cm wide, without handle.

No. 40083

Wooden Handle Ø 28 mm

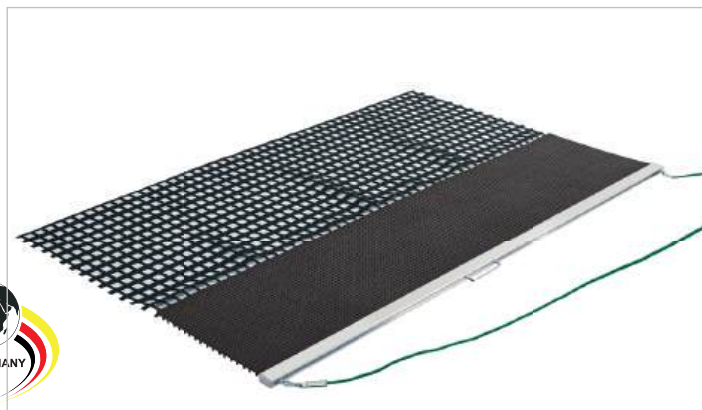

No. 40094

Hard PE Smoothing Mat

The newly developed Universal Sport aluminum profile perfects the long-standing concept of the drag mat hard PE and combiplaner. Due to the 15 x 20 cm individual segments a maximum flexibility of the whole application is given. The manifold scratch elements at the bottom side are ideal for roughening the place and at the same time for smoothing the unevenness and cleaning from leaves without damaging the surface. Especially suited for Cannada -Tennis, artificial grass courts and clay courts. All used material is extremely weather resistant and low wear. Dimensions: 185 x 75 cm

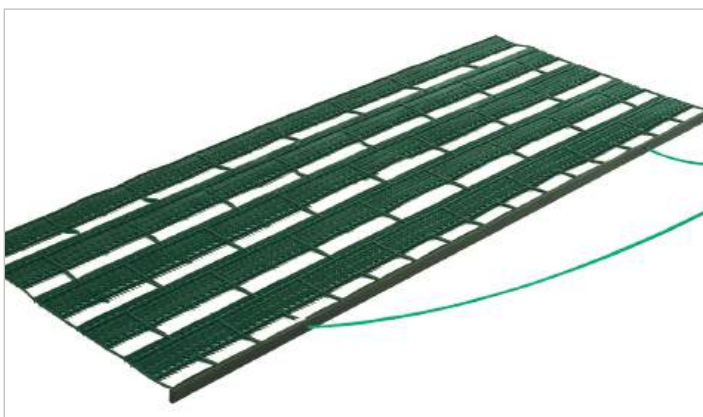

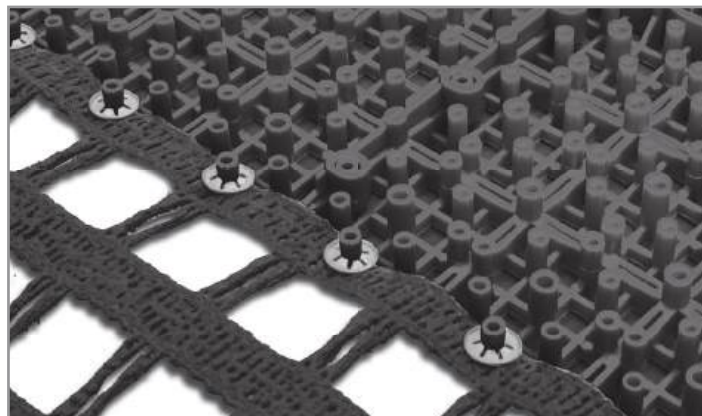

No. 41070

Combination Leveler

The newly developed Universal Sport aluminum profile perfects the long-standing concept of the drag mat hard PVC and combiplaner. This special tool combines the advantages of the drag mat Hard PVC and that of a drag net. The PVC front part opens and clears unevennesses and with the rear part of the heavy drag net the open places are smoothed again and scratched filth gets dragged along. All used material is extremely weather-resistant and low-wear. Working width: 185 cm

No. 41079

Smoothing Mat Super Clean

This mat was developed to remove foliage, leaves, pine needles, etc. in an effective and quick way. This is possible through the smoothing with the Super Clean drag net which leads to excellent court leveling. After the smoothing a shaking out of the net outside the court is sufficient. The net should be kept flat on the ground while using. Dimensions: 180 x 80 cm.

Includes aluminum rail with drag cord.

No. 41077

Uniplan 75

Heavy aluminum pull rod to level the tennis court surface, special PVC fabric extra, double.

Working width 190 cm. Net depth 75 cm with pull rope.

No. 410309

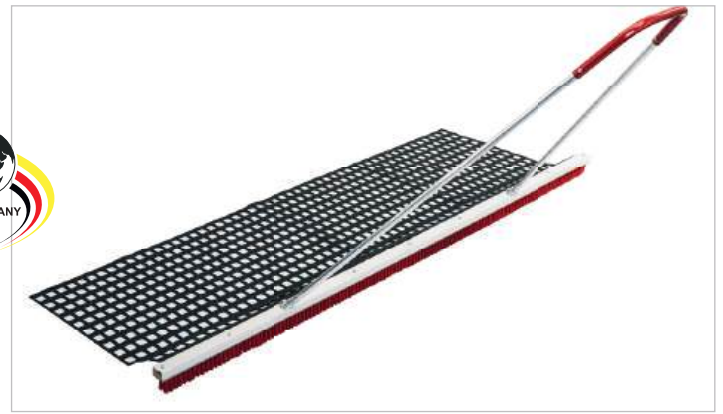

**Broom-Mat Platzfit 150**

Combination broom and mat. Consists of a broom with plastic bristles and PVC drag net. Aluminum rail and handle.

No. 41071 working width 150 cm

Replacement Brushes 150 cm

No. 410712

**Broom-Mat Platzfit 200**

Combination broom and mat. Consists of a broom with plastic bristles and PVC drag net. Aluminum rail and handle.

No. 41072 working width 200 cm

Replacement Brushes 200 cm

No. 410710

**Combined Broom**

The new Combination broom and net. The top court equipment for clay and granular courts. Consists of a plastic/Arenga broom and PVC special net. Aluminum rail and handle.

No. 41073 working width 200 cm

Replacement Brushes 50 cm

No. 40936

**Combined Hand Leveler**

Combination hand leveler and drag net. The ideal tool for smoothing courts after sprinkling or rainfall. Due to the rubber blade and the drag net two operations are done in half the time. Fills unevenness and smoothes the court surface.

No. 41078 working width 190 cm

**Coconut Smoothing Mat**

Heavy-duty coconut mat with PVC edges 190 x 100 cm. Wooden rail with drag cord.

No. 41060

Replacement Smoothing Mat

Size 190 x 100 cm

No. 41050

**Special Smoothing Mat for Silica Sand**

3 cm long coconut fibers, cast in PVC material. Complete with drag cord.

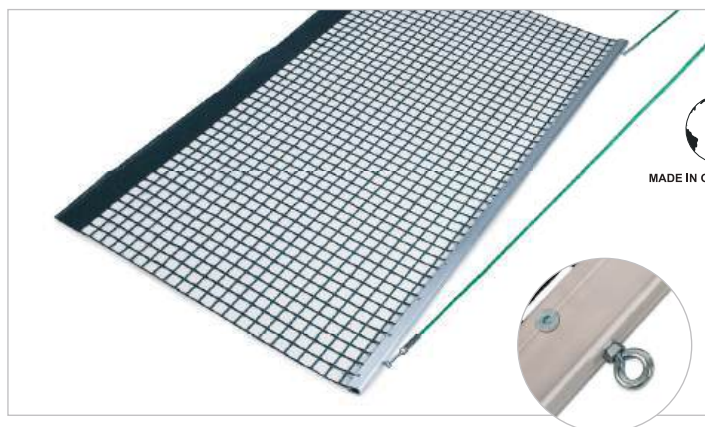

Size 120 x 100 cm

No. 40885

Replacement Special Smoothing Mat

Size 120 x 100 cm

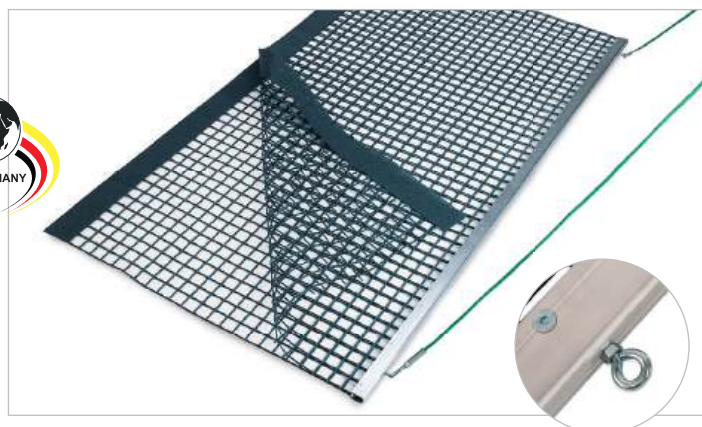

No. 40886

Aluminum Drag Net, Single PVC

One PVC-coated net 190 x 115 cm, with aluminum rail. Suitable for clay and shale courts.

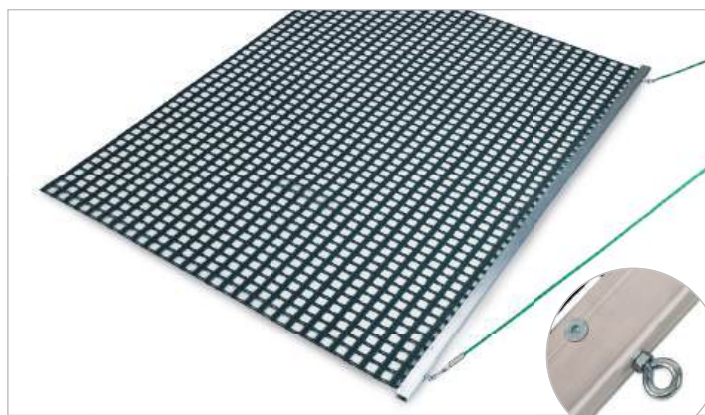

No. 40980

Aluminum Drag Net, Double PVC

Two PVC-coated nets 190 x 115 cm, with aluminum rail. Suitable for clay and shale courts.

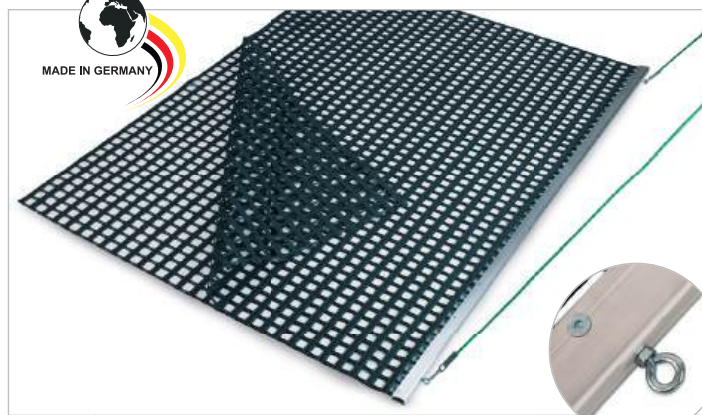

No. 41010

Aluminum Drag Net, Special Single

One Extra-PVC fabric net with aluminum rail and drag cord. Working width 190 cm, depth 150 cm.

No. 410301

Aluminum Drag Net, Special Double

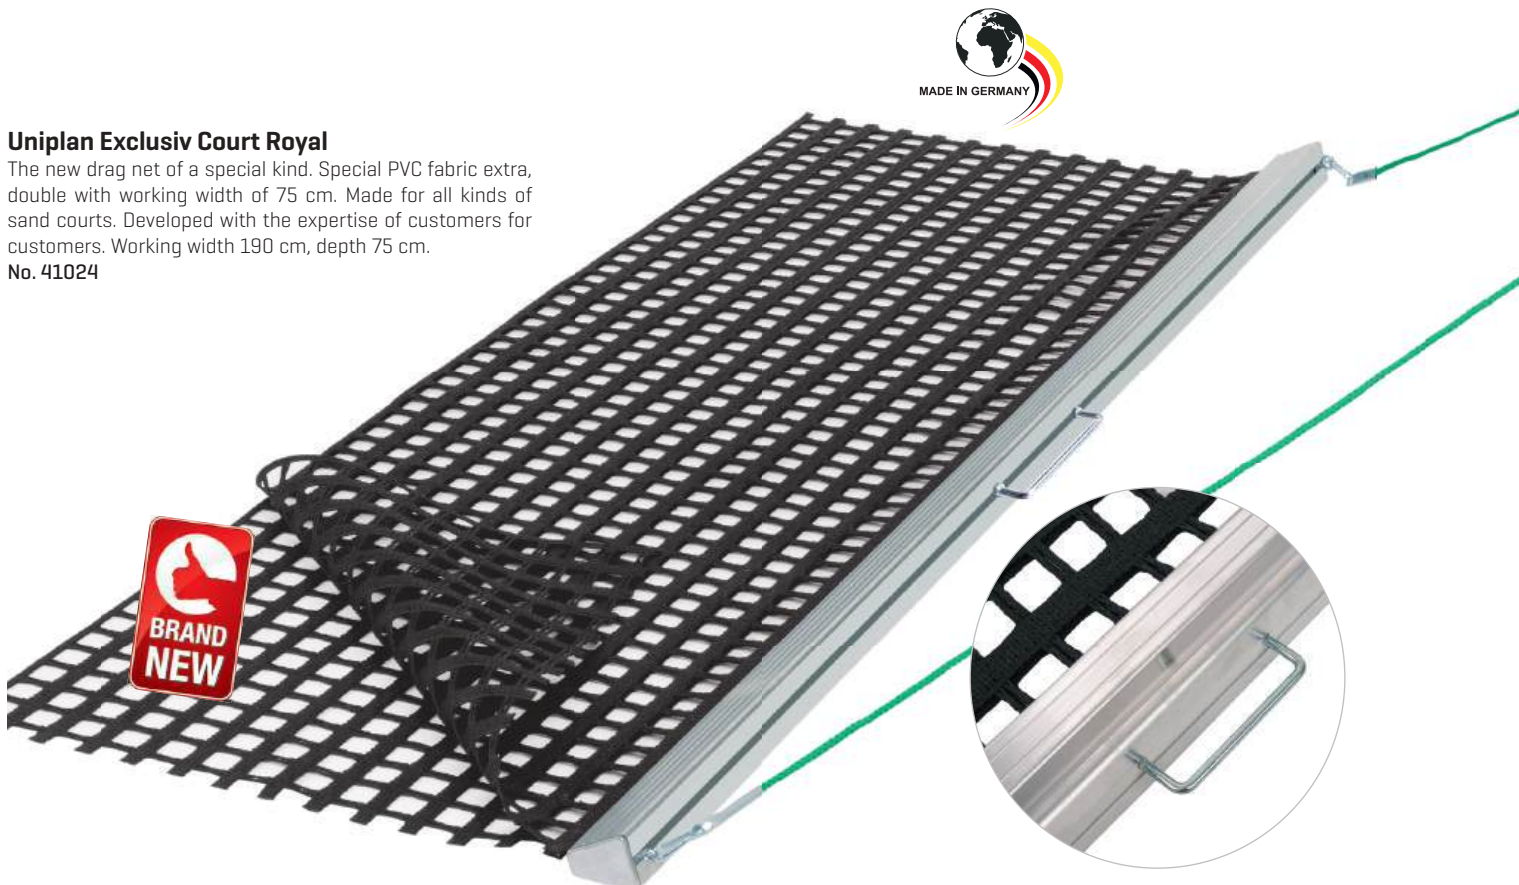

Two special-PVC fabric nets with aluminum rail and pull-handle. Working width 190 cm, depth 150 cm.

No. 410302

Uniplan Exclusiv Court Royal

The new drag net of a special kind. Special PVC fabric extra, double with working width of 75 cm. Made for all kinds of sand courts. Developed with the expertise of customers for customers. Working width 190 cm, depth 75 cm.

No. 41024

**Wooden Drag Net, Single PVC**

One PVC-coated net 190 x 115 cm, with wooden rail. Suitable for clay and shale courts.

No. 41021

Wooden Drag Net, Double PVC

Drag Net Double Holder

The newly developed double drag net holder for ideal storage of smoothing and drag nets. Made of aluminum tubing with two hooks and a fixing bracket for fence posts with Ø 60 mm. The holder is coated in yellow plastic and therefore easily visible.

No. 41434

Special sponge roller

Innovative maintenance device the tennis court in the shortest possible time. Thanks to the specially designed surface structure, the sponge roller has an enormous suction volume. In addition, sand or other materials do not stick. With the handles provided for this purpose, the sponge can be squeezed out in a vertical position in a matter of seconds. Suitable for brick dust, quartz sand or hard court surfaces.

- Sponge width approx. 500 mm
- Sponge diameter approx. 230 mm
- Weight 4.9 kg

No. 41185

Tool Holder

Zinc-plated steel, fixing bracket with standard hook. To hang brooms, drag nets and smoothing mats.

No. 41430 Ø 45 mm

No. 41440 Ø 60 mm

Drag Net Holder

Made of galvanized flat iron, 3 mm thick, includes fixing materials for trouble-free assembly on fence post.

No. 41443

Handle Holder

For all equipment with a broom handle diameter of 23-28 mm. The rubber holder holds the handle securely.

No. 414321

Tool Holder EXTRA

Fixing clamp with rubber lining. Does not damage fence posts. All steel parts zinc-coated. For brooms, drag nets and smoothing mats. For fence post with 60 mm Ø.

No. 41435

Tool Holder

Fixing clamp with 1 hook. For brooms, drag nets and smoothing mats. Made of zinc-coated steel, for fence post with 60 mm Ø.

No. 41431

Hand Brush Holder

Fixing bracket with 2 hooks for hanging hand brushes. Made of steel, for fence post with 60 mm Ø.

No. 41433

Tennis Court Drying Sponge

To soak up smaller puddles on the court.
Dimensions:
50 x 80 x 8 cm
No. 41155

Water Roller

Foam rubber roller with handle. To clear puddles from hard courts, 90 cm wide. All metal parts galvanized.
No. 41180

Scissor roller

aluminum scissor handle.
- Length including roller body approx. 1440 mm
- Total width below approx. 520 mm
- Width of the roller body 500 mm
- Handle width above approx. 520 mm
- Weight 4 kg
[Technical changes reserved]
No. 411855

Spare Roller for Water Roller

No. 41181

Tennis Court Drying Set

Bucket with galvanized grid plate and sponge with aluminum handle. To soak up small puddles on the court.
No. 41182

Detachable
2-part
retaining bracket

Rubber Squeegee "Dry Court"

Made of aluminum, 145 cm wide, replaceable rubber blade, 2 durable wheels in front. Easy and convenient for water removal and ball collection. Works especially well around pools, on driveways, golf greens and any flat or hard surfaces. Comes with one blade for replacement.
No. 41183

Replacement Rubber Blade
No. 41184

Universal Absorbing Roller Special

Absorbing drum with foam rubber covering, hot-galvanized frame and drum body. Thanks to the huge absorbent capacity of this roller it is possible to make a court playable again in a very short period of time. Working width 80 cm.
No. 41141

Replacement Absorbing Drum

No. 41150

Replacement Sponge with adhesive
No. 41151

Full-circle Sprinkler

Large surface sprinkler with a circle diameter of 32 m, thus sprinkling a total area of 800 sqm. Connection 3/4". Without tripod.

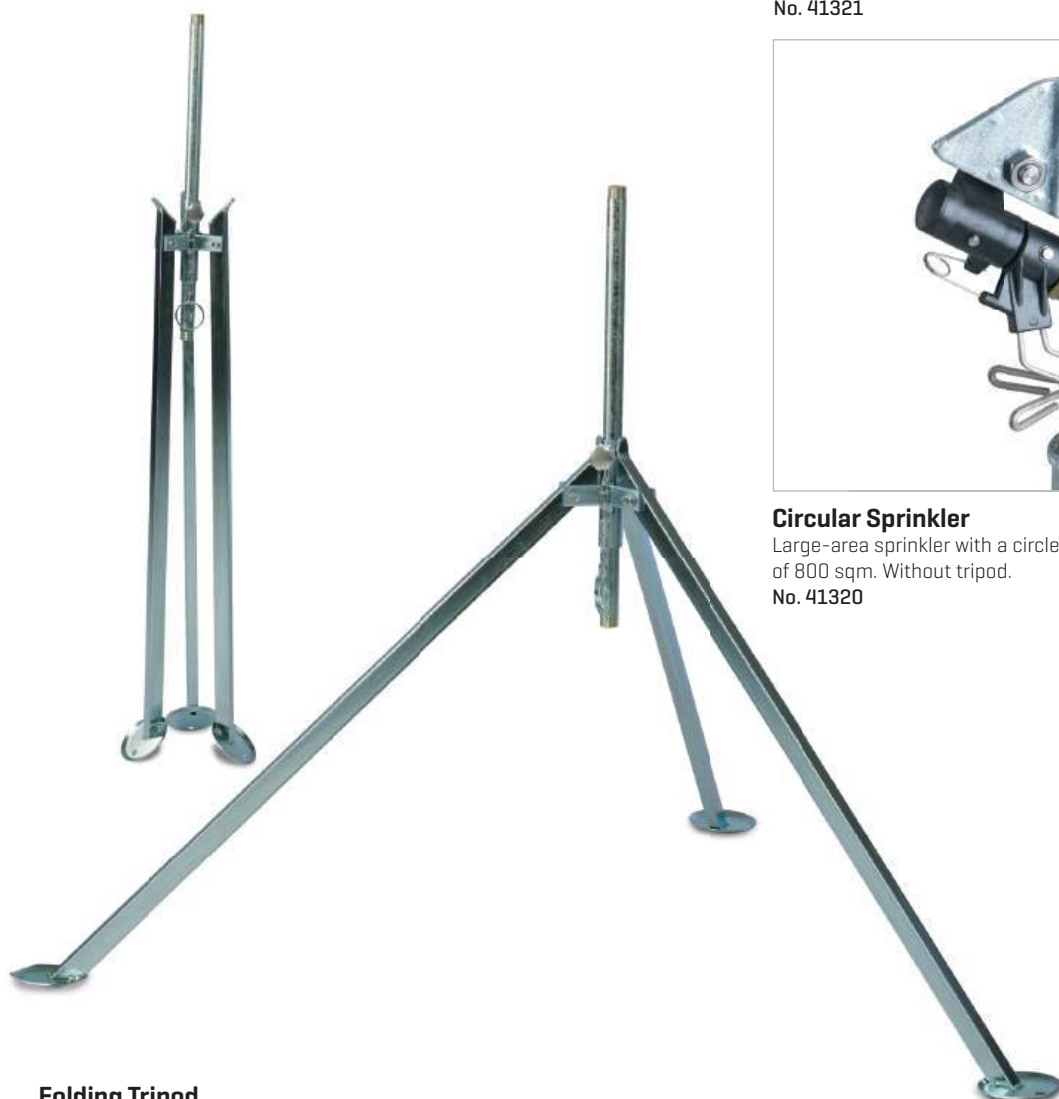

No. 41322

Part-Circle and Full-Circle Sprinkler

Large surface sprinkler with a circle diameter of 32 m, thus sprinkling a total area of 800 sqm. Working area can be adjusted from 20° to 340°, or full-circle. Connection 3/4". Without tripod.

No. 41321

Folding Tripod

Specially developed for the tennis court. Large foot disks prevent damage to the court surface. Folding mechanism makes it easy to handle and to store in small places. Suitable for all types of sprinklers in our catalog.

No. 41323

Circular Sprinkler

Large-area sprinkler with a circle diameter of 32 m, thus sprinkling a total area of 800 sqm. Without tripod.

No. 41320

Perrot - Turbo Quadrilateral Sprinkler

Triton SW

Single-jet oscillating lever sprinkler with hot-dip galvanized steel housing, galvanized steel-plastic coated perimeter plate and impact- and break-resistant plastic housing cover. 22° stream rise and stream disrupter to vary the throw side and water distribution. Polyamide guide housing with brass stabilization.

No. 41331

**Spray Nozzle**

Large nozzle sprinkles evenly over large areas. Complete with Geka connection and tube.

No. 41340

**Spray Nozzle with Shut-Off Valve**

Large nozzle sprinkles evenly over large areas. Complete with Geka connection and tube. With shut-off valve.

No. 41350

**Pistol Spray Nozzle**

Large nozzle sprinkles evenly over large areas. With a pistol grip. Optimum adjustment of sprinkling with shut-off device.

No. 41360

**Adjustable Nozzle**

Made of light alloy metal with hard PVC steel tube. Metal ball valve lever and spray adjuster. Jet length approx. 15 m. Complete with Geka connection.

No. 41361

**Water hose SMARTFLEX SMT Comfort**

5-ply PVC quality hose, UV and ozone resistant, free from algae formation, without plasticisers, high-strength polyester yarn with patented SMT Steady Mesh Technology that actively prevents the hose from twisting.

Properties: extremely easy to handle, excellent flexibility even at low temperatures, high resistance to kinking and crushing. [Temperature -15° to +65°] Applications: for irrigation of tennis courts and sports facilities.

No. 41341

SANDY – Sanding machine

The SANDY sanding device has been thoroughly revised and now makes new sanding during spring repairs even easier and more effective. 2 helpers for material replenishment and approx. half an hour's work are sufficient to apply a carpet of brick dust evenly and in a single operation.

Sandy can be moved effortlessly by hand and holds approx. 120 kg of fresh brick dust. With dimensions of approx. 1000 x 500 x 600 mm and a net weight of approx. 50 kg, it is very easy to handle. Working width 990 mm.

The functional sand spreader was developed by experts and has proven itself in practice on a number of sites. The fresh brick dust carpet is no longer driven over after application. Even on uneven surfaces, you can achieve a completely smooth surface that then only needs to be treated with the trowel.

No. 40142

Tennis court tiller USP 10

With this special milling machine, spring overhauls are carried out in the shortest possible time.

Previously, the used brick dust had to be removed by hand. This often resulted in too little material being removed. Tennis court surfaces became thicker and more impermeable. With the USP 10 tennis court milling machine, these problems are overcome effortlessly! The exact height is adjusted by hand using 2 wing screws. Adjustment is possible on both sides independently of each other. This device allows the tilling depth to be determined with millimetre precision. The milled material is ejected in strips and can be shovelled into wheelbarrows with little effort. The power of the 5.5 hp Honda engine ensures that work with the USP 10 tennis court tiller is absolutely even. Thanks to a comprehensive service network, maintenance and repair of the quietly running engine is guaranteed everywhere. The USP 10 tennis court tiller rolls on 2 independently mounted roller bodies at the front. This distributes the pressure evenly so that it hardly sinks in, even on thawed courts in spring. The rear, treadless solid rubber wheels and the low weight make the machine extremely manoeuvrable and mobile.

The USP 10 tennis court tiller fits through any access door and can easily be operated by one person.

Technical data:

- Length approx. 800 mm - Width approx. 850 mm - Height approx. 1000 mm
- Milling width approx. 655 mm - Weight approx. 75 kg
- Honda engine, 4-stroke, 4.0 kW/5.5 hp

No. 40140

Hand roller I Spezial

Suitable for tennis courts and sports fields. Working width 90 cm. Empty weight 60 kg, with water filling 180 kg, one-piece roller body with rounded edges and counterweights.

No. 40170

Hand roller I

As above, but without counterweights.

No. 40171

Hand roller II Spezial [s. Abbildung nebenstehend]

As above, but much more manoeuvrable due to the split roller body.

No. 40180

Hand roller II

As above, but without counterweights.

No. 40181

+

**Technical data:**

Engine: Honda GX 160, four-stroke engine
4.0 kW = 5.5 hp at 3600 rpm.
Electronic, contactless ignition,
oil warning control system, smooth running,
Intake noise insulation

Easy start due to
automatic decompression system

Fuel: unleaded regular petrol
Drive: hydraulic
Roller: two-piece, 900 mm wide, with differential
for high manoeuvrability, diameter Ø 500 mm
Speed: stepless up to approx. 5 km/h; forwards and backwards

Working width: 900 mm
Weight: empty approx. 350 kg, filled approx. 480 kg
Dimensions: length: 1800 mm, width: 985 mm, height 1100 mm

With biodegradable hydraulic oil!

No. 40136

**Motorised roller USP two-part**

The USP tennis court rollers in proven design and quality with new paneling, improved once again. With two-part roller body and equalising differential for better turning of the roller. The mechanically turned, smooth roller body characterises the USP motor roller. The 900 mm wide trailing roller prevents the roller from sinking into the tennis surface. Better noise insulation and the biodegradable hydraulic oil are unrivalled.

Motor Roller Zagro FUTURA -Self-Driving

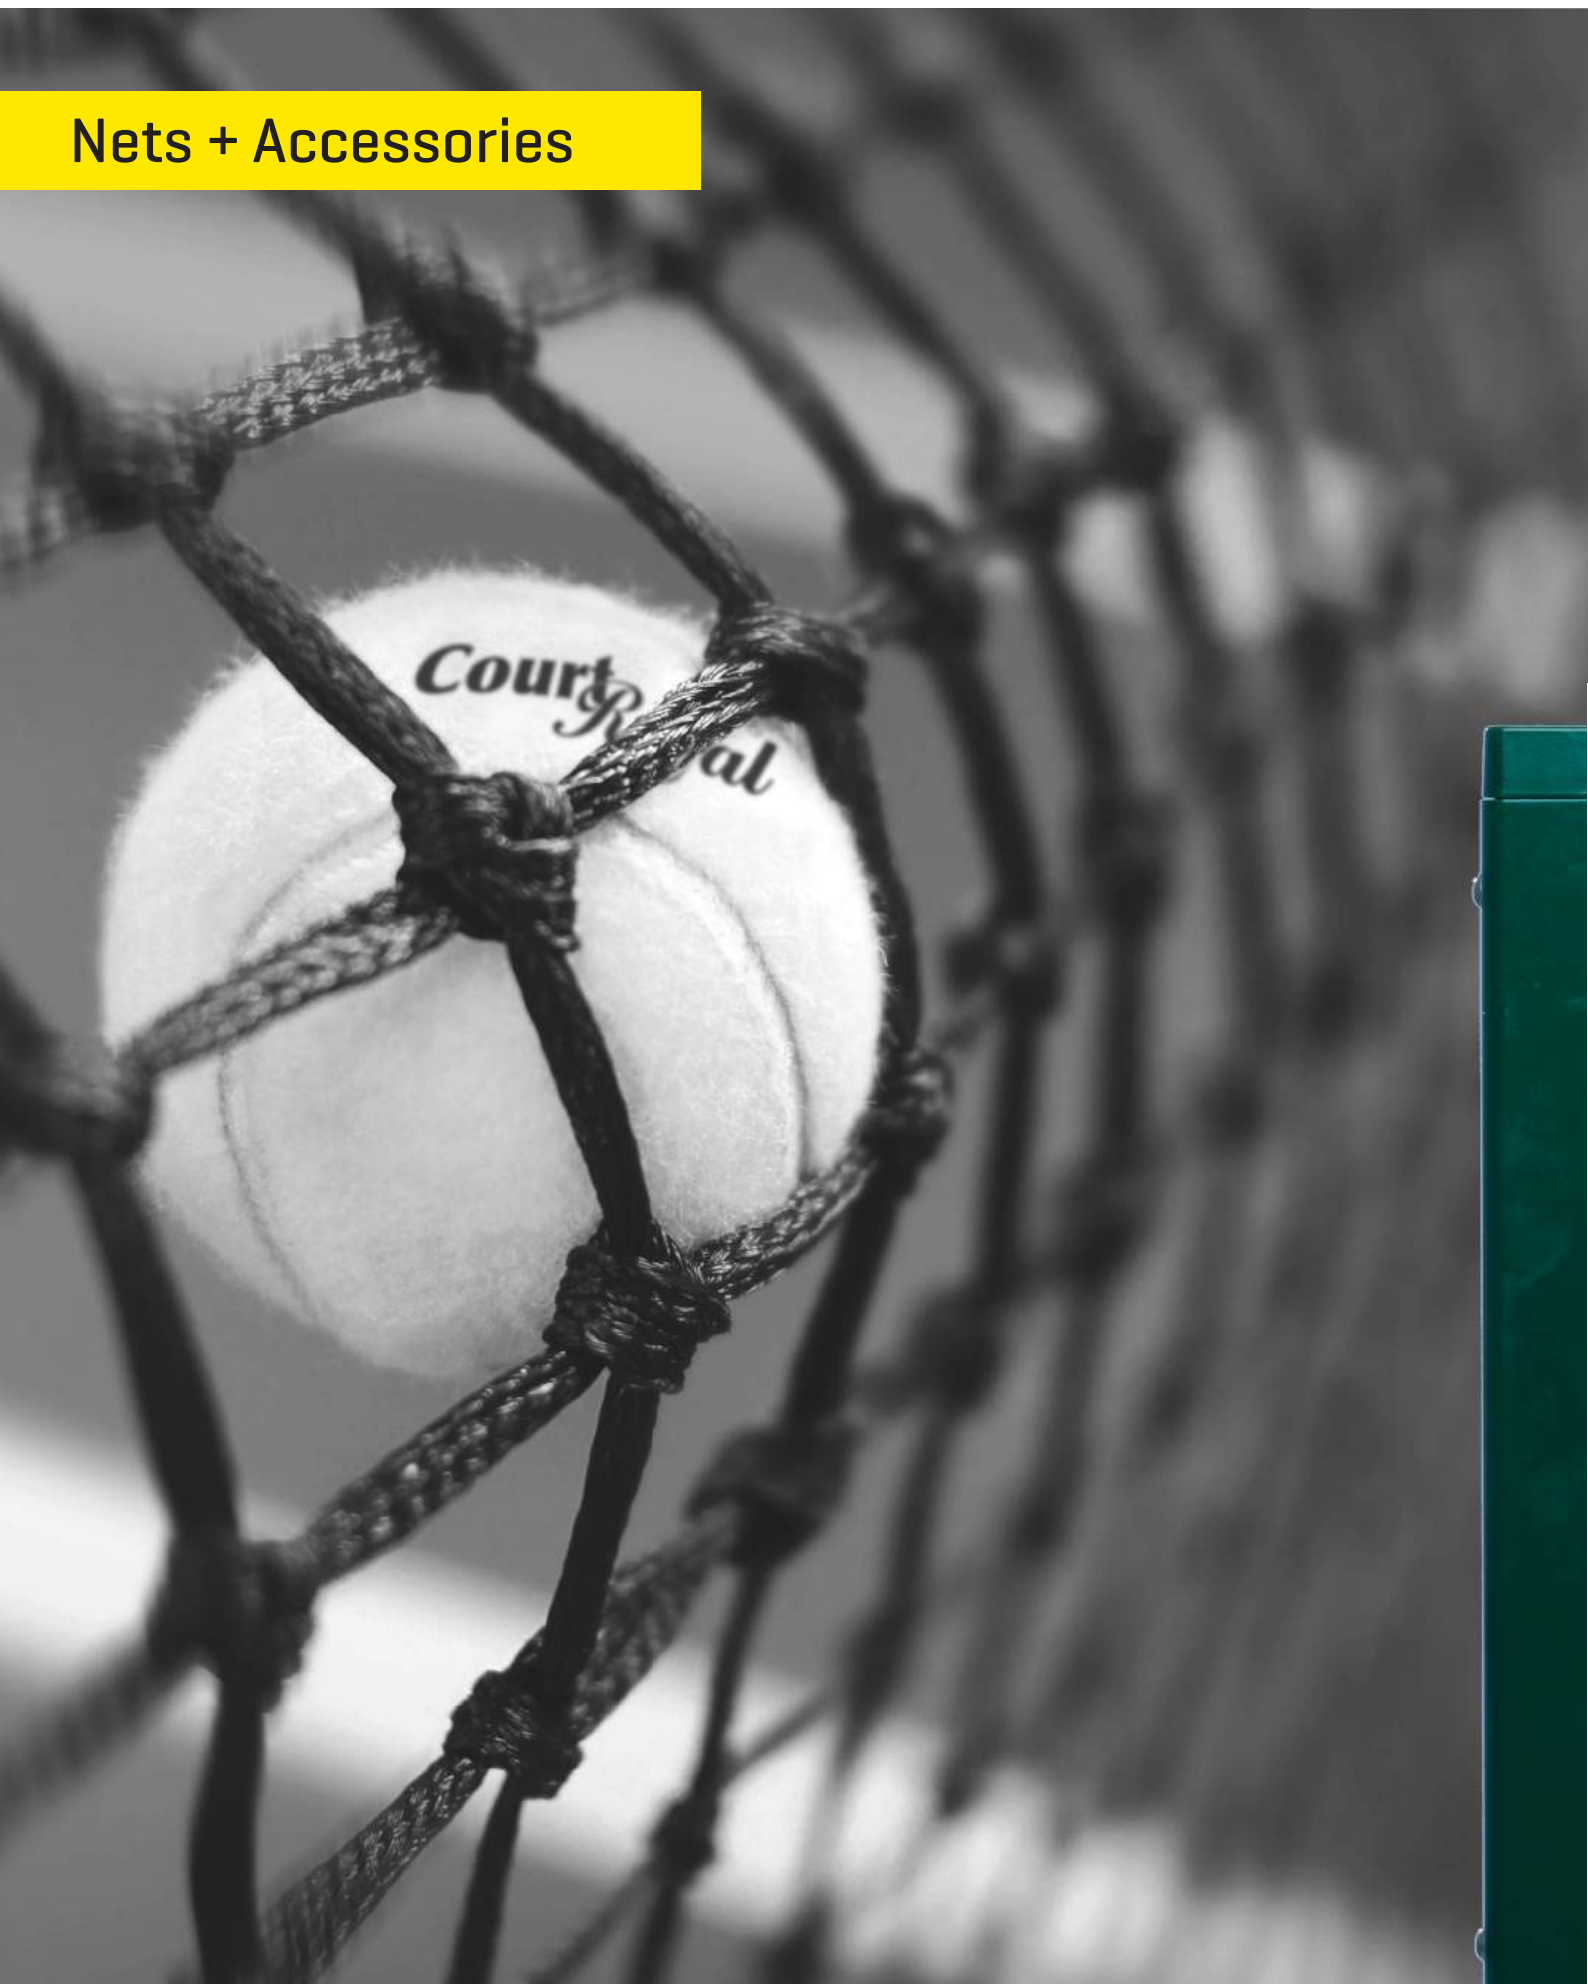

Mount motor roller with a swivelling seat, rubber-coated, broad drive front wheel, split roller body with compensation differential for high manoeuvrability. Simple and easy rolling on the tennis courts.

Technical data:

Motor: Honda GX 160, 4-stroke engine 4,0 kW at 3600 U/min.
Fuel: unleaded gasoline
Drive: hydraulic drive
Roller: single-piece or split; width 900 mm, Ø 508 mm
Speed: infinitely adjustable to approx. 6 km/h,
forward / reverse

Working width: 900 mm
Weight: empty ca. 380 kg, full ca. 510 kg
length: 1800 mm, width 990 mm, height: 1050 mm

Nets + Accessories

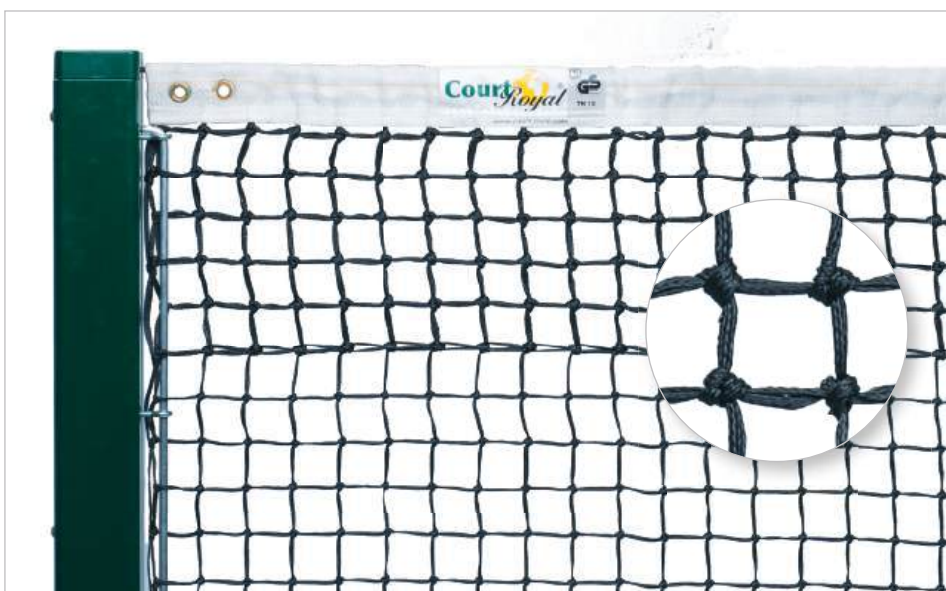

Advantage for COURT ROYAL Tennis Nets

With our COURT ROYAL brand, we have been one of the world's leading manufacturers of high-quality tennis nets for all levels of ability, from club sports to international ATP professional tournaments, for over 38 years. Our nets are exclusively hand-knotted and, with the associated elasticity, offer above-average durability. In addition the nets offer an optimal bounce off behaviour. All tennis nets from our large range are supplied with steel ropes, have the seal for „tested safety“ and meet the strict requirements of DIN EN 1510.

**Tennis Net Court Royal TN 8**

Made of 2 mm braided polyethylene, hand-knotted, black, stable polyester net enclosure stitched four times, complete with steel wire. DIN EN 1510. With European Seal of Approval. No. 40549 black

**Tennis Net Court Royal TN 15 black**

Made of 3.2 mm braided polyethylene, black, hand-knotted, the upper 6 rows double-knotted, stable polyester net enclosure stitched 4 times. A super tennis net, long-lasting, good quality. Complete with steel wire. DIN EN 1510. With European Seal of Approval.

No. 40550 black

**Tennis Net Court Royal TN 20 black**

Made of 3.4 mm braided polyethylene, black, hand-knotted, the upper 6 rows double-knotted, stable polyester net enclosure stitched four times. 1000 times proven, classic tennis net. Used in the tennis league, ATP-tournaments, Davis-Cup, as well as in the Olympics. A top-class product. Complete with steel wire. 2 years factory warranty on the netting. DIN EN 1510. With European Seal of Approval.

No. 40560 black

**Tennis Net Court Royal TN 9**

Made of 3.4 mm braided polyethylene, hand-knotted, black, stable polyester net enclosure stitched 6 times, complete with plastic-coated steel cable. Sides and bottom with heavy, black plastic edging as well as two 10 mm strong fiberglass rods for lateral fixing. Long-lasting and very durable. 3 years factory warranty on the netting. DIN EN 1510. With European Seal of Approval.

No. 40545 black

**Tennis Net Court Royal TN 15 green**

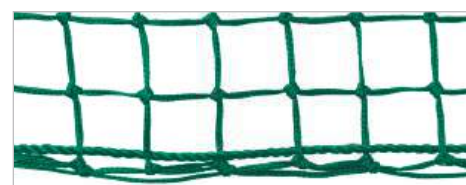

Made of 3.2 mm braided polyethylene, green, hand-knotted, the upper 6 rows double-knotted, stable polyester net enclosure stitched 4 times. A super tennis net, long-lasting, good quality. Complete with steel wire. DIN EN 1510. With European Seal of Approval.

No. 40552 green

**Tennis Net Court Royal TN 20 green**

Made of 3.4 mm braided polyethylene, green, hand-knotted, the upper 6 rows double-knotted, stable polyester net enclosure stitched four times. 1000 times proven, classic tennis net. Used in the tennis league, ATP-tournaments, Davis-Cup, as well as in the Olympics. A top-class product. Complete with steel wire. 2 years factory warranty on the netting. DIN EN 1510. With European Seal of Approval.

No. 40570 green

**Tennis Net Court Royal TN 90 black**

Made of 3.8 mm braided polyethylene, hand-knotted, the upper 6 rows double-knotted, stable polyester net enclosure stitched four times, complete with plastic-coated steel cable. Sides and bottom with heavy, black plastic edging, as well as 10 mm strong fiberglass rods for lateral fixing. Long-lasting and very durable. A tennis net in a special class. 3 years factory warranty on the netting. DIN EN 1510. With European Seal of Approval.

No. 40610 black

**Tennis Net Court Royal TN 30**

Made of 3.8 mm braided polyethylene, hand-knotted, the upper 7 rows double-knotted, stable polyester net enclosure stitched 6 times, complete with plastic-coated steel cable. Sides and bottom with heavy, black plastic edging as well as two 10 mm strong fiberglass rods for lateral fixing. Long-lasting and very durable. 3 years factory warranty on the netting. DIN EN 1510. With European Seal of Approval.

No. 40548 black

**Tennis Net Court Royal TN 50 Tournament**

Made of 3.5 mm braided polyethylene. Hand-knotted, the upper 7 rows double-knotted, very stable polyester net enclosure stitched four times. Complete with plastic-coated steel cable. 2 years warranty on the netting. Mesh size 4 cm, prevents balls becoming stuck in the net. DIN EN 1510. With European Seal of Approval.

No. 40565 black

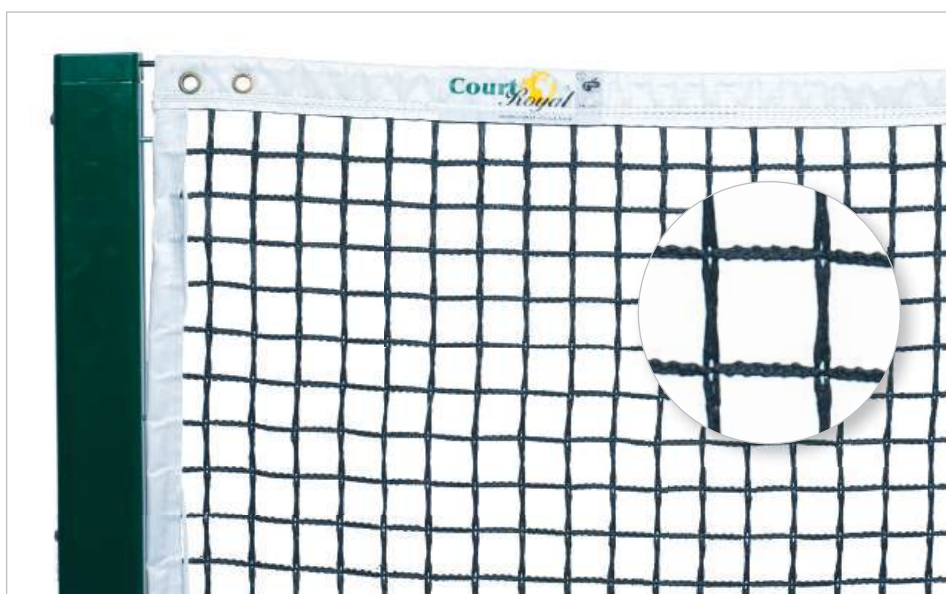

Tennis Net Court Royal TN 90 green

Made of 3.8 mm braided polyethylene, hand-knotted, the upper 6 rows double-knotted, stable polyester net enclosure stitched four times, complete with plastic-coated steel cable. Ball Machines + Training Walls

Air-Tennis practice wall

The recently developed Air-Tennis tennis practice wall is the ideal training partner for everyone, from beginners to experts. This product is a unique and absolutely unbeatable piece of training equipment for use in stationary or transportable mode. It comes in a bag and is easy to transport. To set it up, simply unfold it on the ground and roll it out. Use the bellows [supplied], then fill it with air - it just takes seconds. You can use the air pressure gage, also supplied, to check that the air pressure is at the right level, as this also affects the way the ball bounces back. There are also attachment straps on both sides for attaching the practice wall to our pairs of stands, fences, or sports hall walls. You can also empty it in seconds, simply by turning over the bellows. Players can play on both sides of the Air-Tennis practice wall. It has lines marked on it at the height of the net to guide the player. Tested by international trainers who rated it very highly.

Smash-Back Training Wall

Made of acrylic and frostproof concrete. Homogeneously sealed green coating offers additional protection. Parabolic playing surface guarantees a spot-on ball rebound. The white marking lines are indestructible. This training wall is simply mounted and bolted to a strip foundation with recessed anchor bolts. Can be supplied in two heights, 230 and 300 cm with a 100 cm protective screen. Width individually adjustable with elements. Integration of sound-proofing, recommended in residential areas.

Typ II E

Playable on one side. Height 230 cm, element width 148 cm, without protective screen.

No. 42060

Typ I E

Playable on one side. Height 300 cm, element width 100 cm, without protective screen.

No. 42062

Protective screen Typ E

For single-sided playing walls. Hot galvanized, angled ball protective screen. 100 cm high.

No. 42064

Noise Reduction Type I an II E

For single-sided playing walls, 2,30 and 3,00 m. Prefabricated acrylic concrete slabs with covering and insulating materials.

No. 42068

Tennis Tutor ProLite

The wide speed range makes this machine a superb choice for all beginners. Due to the small size and light weight it can be stored easily and fits in almost all car trunks. A good choice for sports lessons in schools as well as for private use. The ball trajectory is manually adjustable from groundstroke to towering lob. The oscillator delivers shots randomly across the court.

Technical details:

Ball capacity:	125 balls
Dimensions:	[HxWxD]: closed 31 x 50 x 46 cm
Weight:	13 kg
Power:	battery
Playing time:	2 - 3 hours
Recharging time:	12 hours
Feeding interval:	1.5-10 sec.
Top speed:	96 km/h
Ball flight:	stop to lob
Line-directions:	1 direction and random
Case:	plastic
Remote control:	no - on-off switch

No. 42013

Tennis Tutor Plus

The ball machine Tennis Tutor PLUS is battery operated. It is portable and rollable like a suitcase when the handle is pulled out. The ball speed is adjustable from a light throwing ball for beginners to a high-speed ball for advanced players. The trajectory can be set between net roller and lob, regular ball sequence and arbitrary scattering angle.

Technical details:

Ball capacity:	150 balls
Dimensions [HxWxD]:	51 x 50 x 50 cm
Weight:	21,6 kg
Power:	battery
Playing time:	4-6 hours
Recharging time:	12 hours
Feeding interval:	1,5-10 sec.
Top speed:	136 km/h
Ball flight:	short to long
Line-directions:	topspin, spin, flat, slice
Ball spin:	one direction and random
Housing:	plastic
Remote control:	yes on/off

No. 42012

Tennis Twist

Especially designed for children and beginners. The Tennis Twist can be used in clubs and schools as well as in backyards, driveways and even basements. The machine is very easy to use - just turn it on and it shoots a ball every five seconds. The arc of the ball can be adjusted anywhere from approx. 3 - 6 meters.

Technical details:

Ball capacity:	28 balls
Dimensions [HxWxD]:	50 x 20 x 20 cm
Weight:	5 kg
Power:	battery
Playing time:	5-6 hours
Feeding interval:	5 sec.
Top speed:	15 km/h
Ball flight:	straight
Lines-directions:	1 direction
Ball spin:	no
Case:	plastic
Remote control:	no on-off switch

No. 42016

Ball machine Playmate VOLLEY DREAM

The ball machine Playmate Volley Dream is a high-quality portable ball throwing machine with aluminum housing and battery operation. It meets the highest safety requirements. There is a sensor installed, which immediately stops the ball ejection if a person stands in the immediate vicinity in the ejection direction. Furthermore, the new Volley Dream comes with a lockable lid, which must be locked for safety reasons in game mode.

It can be set in seven directions. For example: right, middle, left, left right, right, middle. Likewise, it plays top spin and slice, as well as short-long. The ball sequence can be adjusted continuously to 6-60 pieces of balls per minute. An ideal device for individual or group training. Exact throwing accuracy and quiet running. With the newly integrated accessory „i-Playmate“ you can use an App to control the Playmate i-Shmash via the i-Phone or i-Pad, as well as record, document and compare your training achievements.

Technical data:

- Capacity: about 180 balls with lid closed.
- Dimensions: (height x width x depth) 64 x 56 x 48 cm
- Weight: 31 kg
- Power connection: battery operation (charging current 230 V)
- Battery life: min 4 hours
- Charging time: 6 hours
- Top speed: 140 km / h
- Ball sequence: 1 - 10 sec.
- Trajectory: short-long, infinitely adjustable Ball Types Top Spin, Slice
- Ball Types: Top Spin and Slice
- Spread angle: 7 directions right-left-center
- Housing: aluminum with lockable lid
- Safety: Shut down sensors
- Remote control: wireless, on / off

No. 42005

Remote Control Playmate

General remote control for all Playmate ball machines.

No. 4203420

Ball machine Playmate i-Smash DREAM

The ball machine Playmate i-Smash is the highlight of the ball throwing machines. It meets the highest safety requirements. A sensor is installed, which stops the ball ejection immediately, if a person stands in direct proximity in ejecting direction. Furthermore, the new i-Smash will be delivered with a lockable lid, which must be made for safety reasons.

It can be set in seven directions. For example: right, middle, left, left right, right, middle. Likewise, it plays top spin and slice, as well as short-long. The ball sequence can be adjusted continuously to 6-60 balls per minute. An ideal device for individual or group training.

Exact throwing accuracy and quiet running. The housing is made of powder-coated aluminum. With the newly integrated accessory „i-Playmate“ you can use an App to control the Playmate i-Shmash via the iPhone or i-Pad, as well as record, document and compare your training achievements.

Technical data:

- Capacity: about 240 balls with lid closed.
- Dimensions: [height x width x depth] 96 x 54 x 92 cm
- Weight: 35 kg
- Electricity: 230 V
- Top speed: 150 km / h
- Ball sequence: 1 - 10 sec.
- Trajectory: short-long, infinitely adjustable Ball Types Top Spin, Slice
- Ball Types: Top Spin and Slice
- Spread angle: 7 directions right-left-center
- Housing: aluminum with lockable lid
- Safety: Shut down sensors
- Remote control: wireless, on / off

Space requirement Pickleball court compared to tennis tournament court

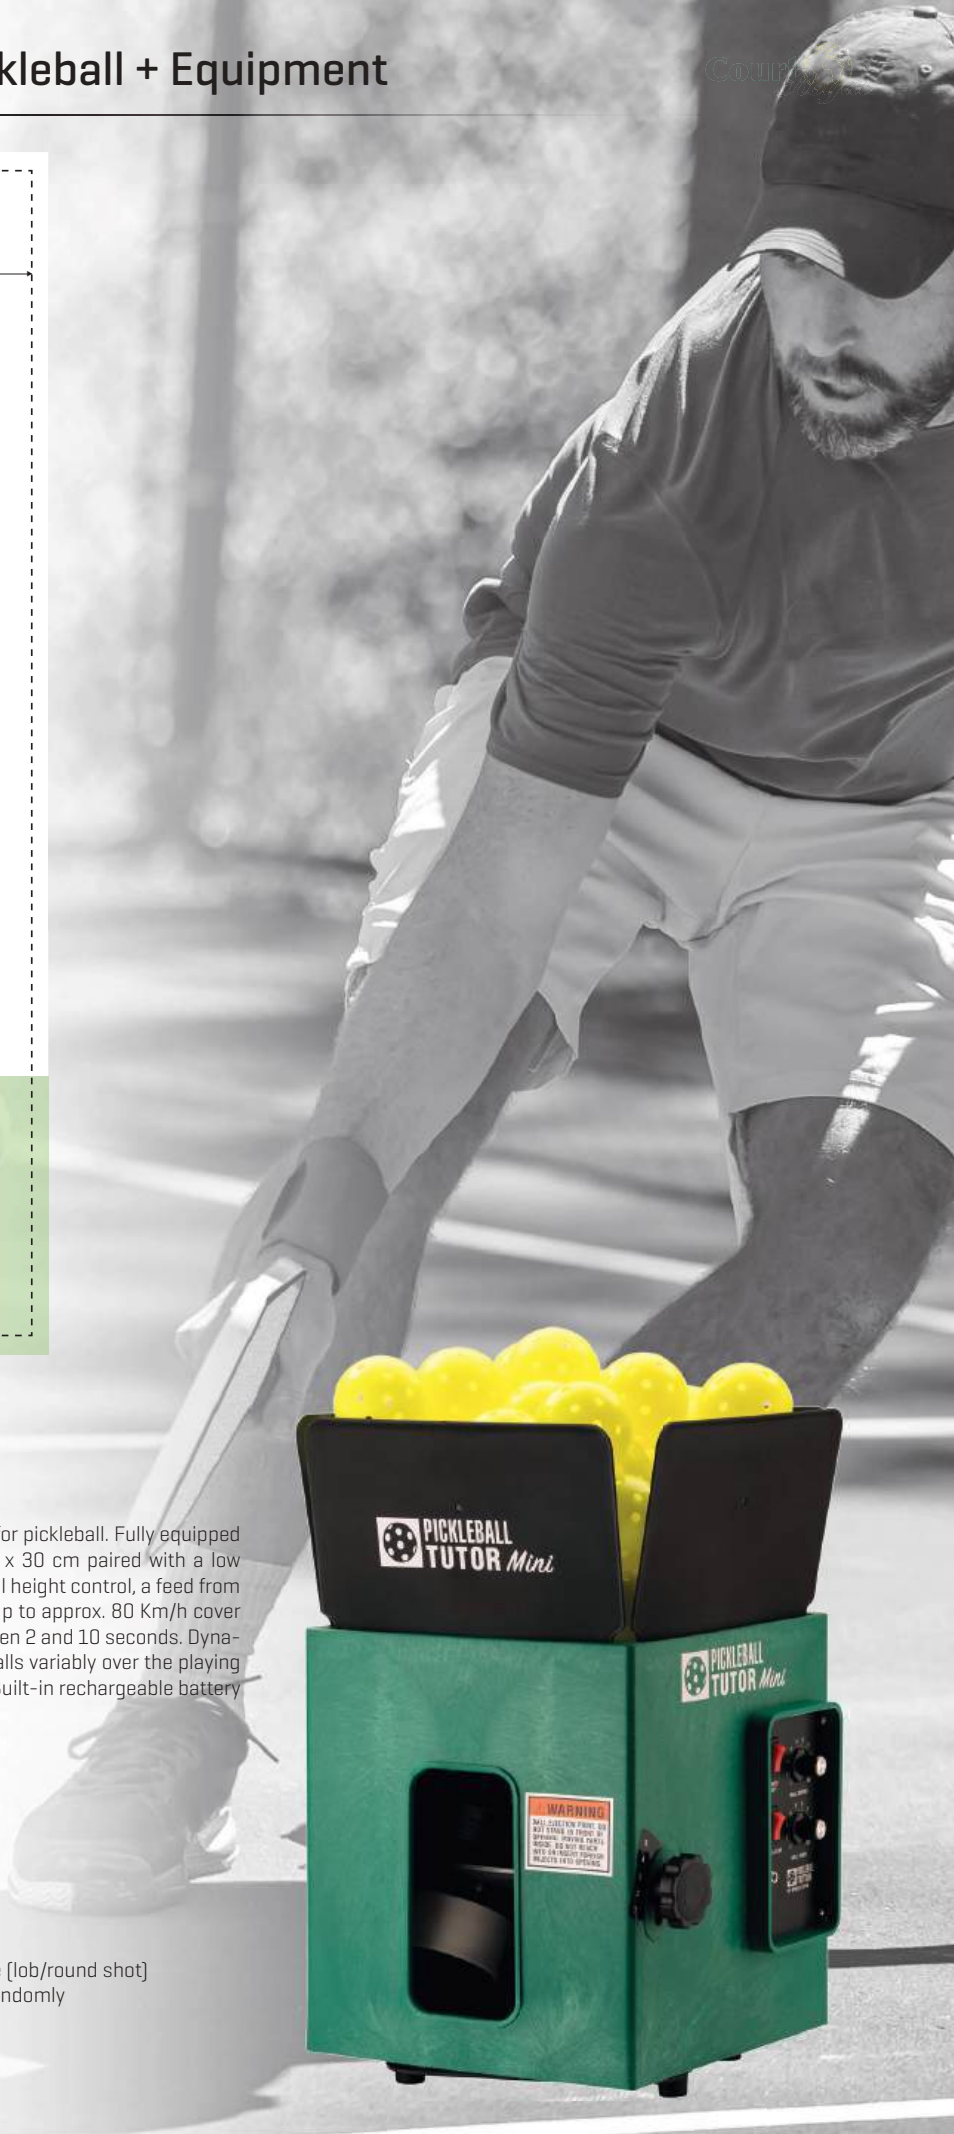

Ball Machine Pickleball Tutor Mini

The new ball thrower is a novelty and was designed specifically for pickleball. Fully equipped and incredibly user friendly. The compact design with 38 x 33 x 30 cm paired with a low weight of around 11 kg allows optimal transport. With the manual height control, a feed from groundstroke to lob is easily possible. Imposing ball speeds of up to approx. 80 Km/h cover every need. A regular ball sequence can be set individually between 2 and 10 seconds. Dynamic training is provided by an oscillator, which distributes the balls variably over the playing field. Great capacity of up to approx. 60 outdoor or indoor balls. Built-in rechargeable battery allows up to approximately three hours of play time per charge.

Technical details:

Ball capacity:	appr. 60 Balls
Dimensions (HxWxD):	38 x 33 x 30 cm
Weight (with battery):	ca. 11 kg
Power:	battery
Playing time:	2 – 3 hours
Recharging time:	12 Std.
Feeding interval:	2-10 sec.
Top speed:	appr. 80 km/h
Ball flight:	manually adjustable (lob/round shot)
Line-directions:	one direction and randomly
Ball type:	indoor and outdoor
Housing:	plastic
Remote control:	none, on-off switch

No. 404270

Padel Tennis net post PP 73 with plate

Round design \varnothing 73 mm made of plastic-coated aluminium three-chamber special profile, very stable with screw-on aluminium gear mechanism. Net holding rods and all screws and hooks made of VA steel. With base plate for fixing to the concrete slab with dowels.

Length above ground: 92 cm

No. 40636

Padel Tennis net post PP 73

Round design \varnothing 73 mm made of plastic-coated aluminium three-chamber special profile, very stable with screw-on aluminium gear mechanism. Net holding rods and all screws and hooks made of VA steel. For installation in the ground, supplied without ground sockets. Total length: 125 cm, above ground: 92 cm

No. 40635

Ground sleeves 73

Ground sleeves for 73 mm \varnothing padel posts.

No. 404281

Padel court broom plastic yellow

150 cm wide, with 3 interchangeable broom sections on an aluminium base frame. Complete with three-part, very sturdy aluminium drawbar and mountable net deflectors. The ideal maintenance broom for synthetic turf surfaces filled with quartz sand. Plastic bristles, yellow, angled.

No. 408811

Spare broom plastic yellow

No. 40883 50 cm

Padel Tutor Plus ball throwing machine

The Tennis Tutor Padel is a battery-operated ball throwing machine specially designed for padel balls. With its compact dimensions of 51x50x51 cm and a weight of just 21.6 kg, it is ideal for transporting. Thanks to the extendable handle and wheels, the machine can be pulled as a trolley. The ball speed can be customised from a slow ball to a high-speed ball with 136 km/h. The trajectory can be varied between net roll and lob, a regular ball sequence or a random scattering angle in 1.5-10 seconds. The practical, fold-out ball container holds approx. 150 balls. With a battery life of 4-6 hours, extensive training is possible without any interruptions until the ball throwing machine is recharged.

Technical data:

Capacity: approx. 150 balls
 Dimensions [height x width x depth] 51 x 50 x 51 cm [closed]
 Weight [with battery] 21.6 kg
 Power connection Battery operation [charging current 230 V]
 Battery life 4 - 6 hrs.
 Charging time 12 hours
 Ball sequence 1.5 - 10 sec.
 Maximum speed 136 km/h
 Adjustable short - long trajectory
 Ball type topspin, spin, flat, slice
 Spread angle 1 direction and random
 Plastic casing
 Remote control wireless on/off
No. 40640

Padel Balls unlimited

The combination of a robust rubber core with a high-quality felt layer meets the special requirements of padel play. Good ball control and a precise point of impact are guaranteed. Compared to tennis balls, the internal pressure is reduced. Weight: approx. 56 g.

No. 40637 Tin of 4

Padel tennis net PN 8

Made of approx. 3 mm high-strength polypropylene, black, PES net edging tape. Complete with plastic-coated steel cable. 3-year factory guarantee on the net. Dimensions: 1000 x 92 cm, mesh size 4.5 cm
No. 40630

Padel tennis net PN 9

Very stable plastic double net surround, complete with plastic-coated steel cable. Sides and bottom edges with heavy, black plastic edging and two 10 mm thick fibreglass rods for lateral fixation. Long service life and optimum durability. 3-year factory guarantee on the net. Dimensions: 1000 x 92 cm, mesh size 4.5 cm
No. 40631

Center Strap III

With plastic snap lock, spring hook and Velcro strip.
No. 40720

Padelcourt screen Digimash

4 C digital print.
 With silver-coloured eyelets every 50 cm.
 Dimensions: 1850 mm x 900 mm
 Delivery incl. snap hook
No. 41526 one-sided printing

No. 41527 double-sided printing

Volleyball Post Heavy Duty

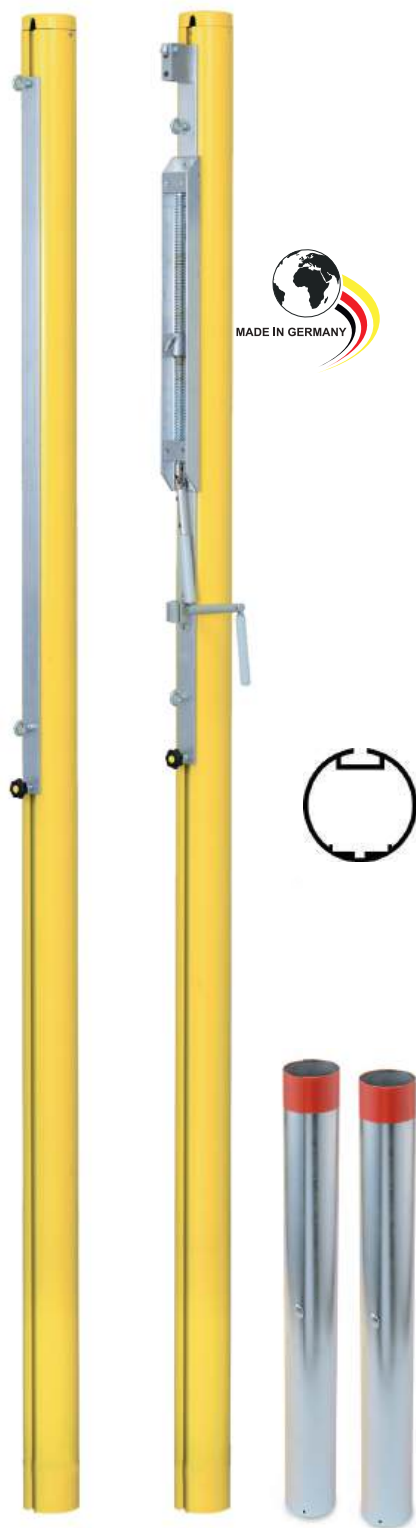

Absolutely weatherproof, very sturdy, vandalism-proof, competition-approved volleyball post made of 90 x 90 x 4 mm hot-dip galvanized steel profile. Height adjusted with a very easy-to-handle mechanism. Net tensioned with a turnbuckle. Complete with ground sleeves 35 cm. Post length 300 cm.
No. 30510

Volleyball Post Universal 83 Aluminum

Reliable, solid volleyball post 83 mm made of aluminum special profile, compliant with DIN 78966. Easy-running net attachment and tensioning devices continuously adjustable. All steel parts are galvanized. Post surface is matt-silver anodized. Complete with ground sleeves and covers.
No. 30501

Volleyball Post Universal 80 Aluminum

Reliable, solid volleyball post 80 x 80 mm aluminum, compliant with DIN 7896. Easy-running net attachment and tensioning devices (galvanized, trapezoid thread mechanism) continuously adjustable. Surface of the posts and impulse profiles are matt-silver anodized. Complete with ground sleeves and covers.
No. 30500

Beach Volleyball Post Court Royal 83

83 mm Ø aluminum (DIN 7896). Easy running net attachment and tensioning devices (galvanized, trapezoid thread mechanism) steplessly adjustable. Surface is yellow powder-coated.

Delivery without ground sleeves
No. 30693

Ground sleeves

Made of hot-dip galvanized steel for installation in sand fields, length 70 cm
No. 30694

Volleyball Referee Tower

Umpire chair made of aluminum special profile Ø 35 mm, height-adjustable, 3 adjustment options, complete with 4 rubber pads, 2 lashing straps and writing board.
No. 30600

Volleyball Referee Tower Professional

Solid steel construction, painted black, height-adjustable, wooden platform. Ladder entry from the back. Two transport wheels for the easy transport of the umpire chair. Used at numerous volleyball tournaments.
No. 30603

Beach Volleyball Marking Lines

9 x 18 m, made of polyester tape 50 mm, with loops at each corner and middle marking. Complies with the GVF [German Volleyball Federation] requirements. Wounded onto a plastic roll. Complete with 4 ground anchors. Color, dark blue.
No. 30688

Beach Volleyball Marking Lines Turnier

9 x 18 m [or 8 x 16 m] with adjustable plastic corner elements, 50 mm wide PES-webbing and middle marking. Complete with 4 plastic ground anchors, 23 cm long and bungee tensioning ropes. color: dark blue.
No. 30686

Badminton Umpire Chair

Elegant aluminum badminton umpire chair with European Seal of Approval DIN EN 131. Very robust because of the stable ladder and the projecting supports with four base plates. The seat mount has an extra crossbar behind the UV-resistant body-contoured seat. Including writing-board.

Technical details and basic equipment:

- Mobile and flexible conveyor belt system for temporary limited use
- Quick assembly and dismantling
- Simple hook-in and Velcro system, without screw connections
- Safety-tested design in accordance with DIN EN 15312 With certificate: robust, weatherproof, low-noise
- Closed all-round railing system, approx. 90 cm high, approx. 2.5 cm thick
- Boards made from plastic-coated hard foam board (white)
- Basic construction made of corrosion-free aluminium
- Fully welded mini football goals, integrated into the perimeter system
- Perimeter boards are ideal as advertising space
- Ideally suited for events, street festivals, trade fairs, company parties

Youth Soccer Goal Court Royal 3 x 2 m, completely welded, in 4 parts

The newly developed Youth Soccer Goals Court Royal are delivered in four parts. Their stability comply with the fully-welded aluminum-goals. The fully-welded side frames are joined by 102 mm long round profile bars which are fitted with very sturdy interior profiles to join the parts together. Goalposts and bars are made of aluminum. The warp-resistant profile is fitted with a particularly deep groove, in which the plastic net-holders are inserted. According to regulations a tilt-resistant ground anchoring for grassy fields is included. Alternatively anti-tilt weights for synthetic fields are available. The goal meets the FIFA and DFB standards and is produced according to DIN EN 748.

Dimensions: 3 x 2 m, Depth at base: 1,25 m

No. 202022

Youth Soccer Goal Court Royal, fully welded, in four parts

The newly developed free-standing Youth Soccer Goals Court Royal are made of plain aluminum and are delivered in four parts and comply with its stability with the fully-welded aluminum goals. The goal frames and base frames are of 120 x 100 mm oval profiles. The two side elements are fully-welded and are connected with the cross bar by super stable interior profiles.

The torsion-free special profile is fitted with a groove in which the provided plastic net holders can be inserted. For additional charge of 7 % the goals can be delivered with an integrated net holder. According to regulations an ant-tilt-resistant ground anchoring for grassy fields is included.

Alternatively an anti-tilt-resistant ground anchoring for hard courts is available as well. The goals comply with the FIFA and DFB standards, are produced according to DIN EN 748 and are safety tested [GS-tested]. Dimensions: 5 x 2m

Info box TMD 95

Die Info-Kästen der Serie TMD 95 sind für den Außen- und InnenThe information boxes in the TMD 95 series are absolutely weatherproof constructions suitable for outdoor and indoor use. They are made of high-quality, torsion-free aluminium profiles with a construction depth of 95 mm. The surface is silver matt anodised [E6-EV1].

Basic housing

Very sturdy aluminium frame with recessed, corrosion-resistant coated steel rear panel.

Front frame

The front frame consists of torsion-free multi-chamber aluminium profiles with integrated, weather-resistant rubber seal and shatter-proof acrylic glass pane.

Front frame stop without hinges

The special aluminium profiles that interlock across the entire width make it possible to dispense with hinges. This results in significantly greater stability.

Special opening mechanism

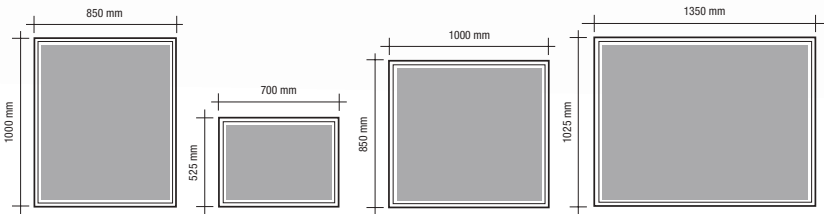

The front frame opens upwards. It is held in the open position by automatically engaging catches. The locking mechanism is released by lifting the front frame again.

Safety lock

A high-quality safety lock is fitted on the underside. This ensures trouble-free and simple operation. 2 keys included in the scope of delivery.

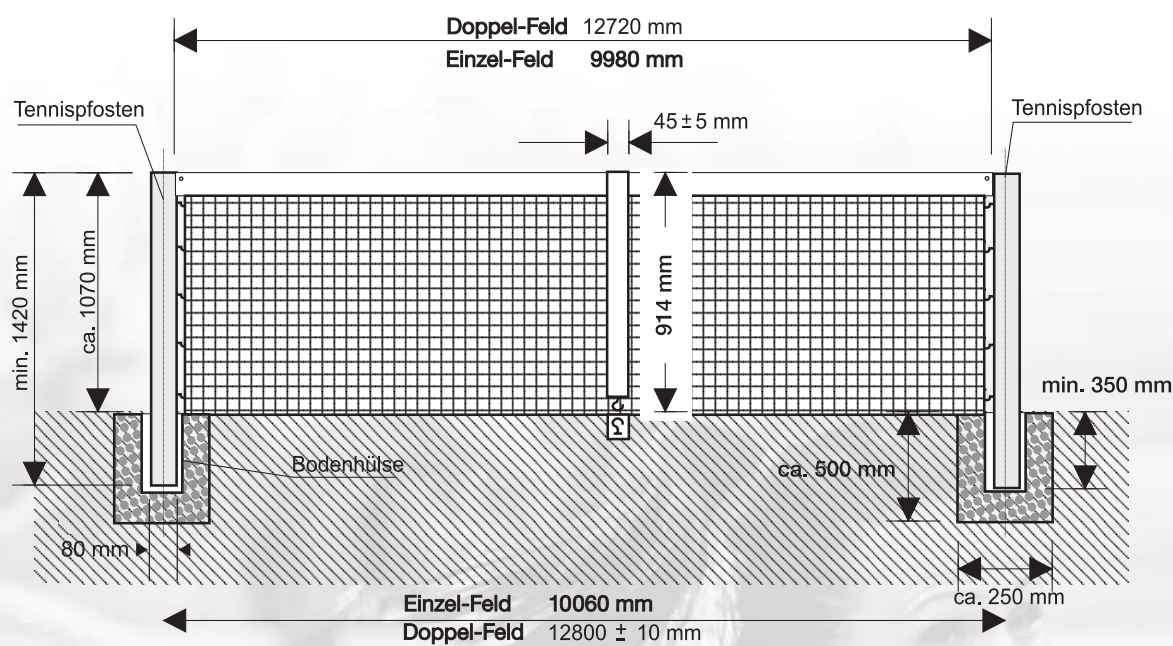

Wall mounting

It is attached to the wall using two aluminium profile rails, which are installed on the wall side. The info box is hooked into the rails and fixed in place with 2 screws. All fastening parts are housed in the profiling of the frame. This means that it cannot be removed when closed and offers a high level of theft protection.
